

UNESCO is celebrating ... and you can contribute

50th Anniversary of the Intergovernmental Hydrology Programme and 60 Years of UNESCO Water Sciences

Together with the German National IHP Committee, and the UNESCO Water chair of Heribert Nacken, the International UNESCO Center for Water Resources and Global Change (ICWRGC) will organize a side-event for the anniversary celebrations from 11-13 June in Paris:

A virtual reality journey through 60 years of international landmark contributions from the German water research sector to IHP and vice versa.

We will visualize along a time axis within a virtual reality Guggenheim Museum. Each of the six levels of the famous spiral-ramped rotunda of the Guggenheim museum will represent one decade of hydrology and water science.

We seek for text, figure, audio, video contributions or interviews.

Join our virtual reality journey in Paris

1. Most significant event in 60 years of international water research?
- in general
- in connection with IHP
2. Central contribution of hydrological research to IHP in the last 60 years
- from Germany?
3. Central contribution of UNESCO-IHP to the water research landscape in Germany?
4. Important topics for the future and opportunities for IHP to address them?

More Information

- Please use our questionnaire platform to indicate your contribution
Deadline: April 30, 2025
- We will have a selection process and we will come back to you asap with further details
- We will also work on a legacy product beside the virtual reality journey, i.e. a brochure.
- More information via icwrgc@bafg.de
